Glazed Ergofocus

### THE NEW DOMOFOCUS AND ERGOFOCUS JOIN THE GLAZED GYROFOCUS.

With the launch of the new GLAZED versions of the Domofocus and the Ergofocus, two symbols of the brand, FOCUS is expanding its range of eco-efficient fireplace models.

A recent recipient of two prestigious Archiproducts Design Awards, the new Glazed Gyrofocus has been recognised in both the Finishes and Special Mention for Sustainability categories. FOCUS has for many years been dedicated to the transformation of its wood-burning fireplaces, with a triple objective of energy performance, eco-responsibility and all this without altering the original design. Now Domofocus and Ergofocus join the glazed fire family.

Glazed Domofocus

## **BEYOND DESIGN, ENERGY PERFORMANCE**

FOCUS now presents three glazed Ecodesign models. The original designs of both Ergofocus and Domofocus also remain intact. The pure and ergonomic shape of the former and the development of the curves of the latter have been perfectly preserved as well as their 360° swivel action. As with the Gyrofocus, an ingenious sliding glass window offers a perfect view of the flames without risk of sparks flying.

## **BEYOND THE DESIGN, THE TECHNOLOGICAL CHALLENGES**

Focus is the only company in the sector to constrain the combustion chamber of its fireplaces to their design. This already difficult challenge has become much more complex with the ambition to close its fireplaces and provide them with real energy performance, making them eco-efficient. The organic shape of these iconic models were not initially suited to this dual technological problem.

Focus began a dedicated transformation of its industrial process ten years ago, by creating an R&D department and investing more than 6 million euros into it. In order to further speed up and streamline the certification process, Focus has also equipped itself with a test bench identical to that used by the European laboratories that award Ecodesign approval. It is thanks to this strong technological component, to a culture very specific to its own products and to a limited series production that Focus can take up these challenges.

Glazed Ergofocus

### Gyrofocus and Domofocus energy performance:

- Yield : 81%
- CO at 13% of O<sub>2</sub> : 0,09% (1102 mg/Nm<sup>3</sup>)
- NO<sub>x</sub> at 13% O<sub>2</sub> : 151 mg/Nm<sup>3</sup>
- OGC al 13% O<sub>2</sub> : 34 mg/Nm<sup>3</sup>
- Dust emissions : 19 mg/Nm<sup>3</sup>
- Energy (or heat output): 18 kW

### Ergofocus energy performance:

- Yield : 80%
- CO at 13% of O<sub>2</sub> : 0,09 % (1187 mg/Nm<sup>3</sup>)
- NO<sub>x</sub> at 13% O<sub>2</sub> : 93 mg/Nm<sup>3</sup>
- OGC al 13% O<sub>2</sub> : 33 mg/Nm<sup>3</sup>
- Dust emissions : 16 mg/Nm<sup>3</sup>
- Energy (or heat output): from 6 to 10 kW

DESIGN AWARDS  
—  
WINNER 2021

## THE GLAZED GYROFOCUS: ARCHIPRODUCTS 2021 WINNER

Since autumn 2021, the Gyrofocus, the world's first suspended and rotating fireplace, has been available with a glazed window that in no way betrays its status as an icon of international design. Proof that Focus models are not only beautiful, but also smart. The first official recognition came at the end of last year for the company's commitment to creating eco-responsible products and it is why the Glazed Gyrofocus was crowned at the Archiproducts Design Awards (ADA) 2021.

The ADA jury, made up of environmental, eco-design and sustainability experts from the world of architecture and design, rewarded products capable of distinguishing themselves through the use of recyclable and biodegradable materials, production with low polluting emissions, their commitment to guaranteeing a minimal environmental impact throughout the life cycle of the product.

There were more than 100 nominees for the Special Mention for Sustainability from all over the world. The Glazed Gyrofocus has distinguished itself by its capacity for innovation, its high technology and above all by its legendary design, now as eco-efficient as it is sustainable.

**The trio stand together as a new family of glazed eco-efficient fireplaces: Gyrofocus, Domofocus and Ergofocus.**

## FOCUS, AN INTERNATIONAL DESIGN LEGEND

For over 50 years and across all continents, FOCUS has been shaking up design codes with its innovations. It was the first to move the fireplace from the wall to the centre of the room, making it the focal point of the interior.

FOCUS has nearly 120 employees spread over two sites with both feet planted firmly between the Cevennes and Provence in the south of France. Proud of its Made In France moniker, FOCUS has its head in the stars and its eyes firmly set on the international scene.

With its emblematic fireplace, the Gyrofocus, FOCUS has definitely entered into international design legend. FOCUS is more than fireplaces, it creates surprises, emotion, occasion. FOCUS creates the story.

FOCUS is readily available throughout the UK and Ireland.
