

## FOCUS CONTINUES TO DEVELOP ITS BIOETHANOL RANGE: FOLLOWING THE GYROFOCUS, INTRODUCING THE DOMOFOCUS

Smokeless, with no need for an external flue outlet on the roof, this is the true advantage of Focus's new bioethanol range: **a fireplace that you can install anywhere you want!**

DOMOFOCUS BIOETHANOL ©DOMINIQUE IMBERT

- A true revolution, the bioethanol Domofocus, like the Gyrofocus, can feature in spaces where it was previously impossible to install a fireplace: **in an apartment on any floor, on a concrete or IPN beam, under a mezzanine, etc.**
- There are no longer the usual constraints restricting the position of a fireplace in the room: these models are not bound by the conventional requirements for flues.
- Another major advantage is that **smokeless combustion** allows this fireplace to be installed in geographical zones where wood combustion is now prohibited.

A Focus fireplace is now possible virtually anywhere for devotees of iconic design.

This innovative fireplace, developed in partnership with the French specialist in high-end bioethanol burners Ignisial Paris, is designed to be **autonomous**, operating with an electric **battery**. The fully **electronic, safe burner** is operated by remote control.

## IT IS SAFE

The appliance has an electronic filling pump, a safeguard that prevents refilling or relighting after operation while the fireplace is still hot, an overflow protection system, and a built-in CO2 sensor. These safety features were critical in Focus's decision to partner with Ignisial Paris to develop a burner specifically designed for the Domofocus.

## IT IS ATTRACTIVE

The burner has been conceived for the interior space of the Domofocus in perfect harmony with the opening of the fireplace. The flame play, the ultra-realistic ceramic logs and simulated glowing bed of embers are stunningly similar to a real wood fire. The Domofocus bioethanol has excellent heat output and offers a cosy and welcoming fire in keeping with the fireplace's iconic history.

## IT IS RETROFITTABLE

Another major innovation is that the burner has been designed so that it can be retrofit for an older-generation Domofocus with an open hearth. The wood-burning hearth can be converted to a bioethanol burner by removing the grate used for the logs and sweeping the flue. This must be carried out by an authorised dealer. This retrofitting system is an effective environmental solution in all regions where regulations restrict wood-burning fireplaces.

## IT IS MADE IN FRANCE

This innovation is 100% 'Made in France', from design to production. Moreover, Focus recommends using Alufam bioethanol produced by Ignisial Paris, an odourless and colourless fuel made from sugar beet grown and distilled in France in the region of Champagne.

## TECHNICAL INFORMATION

### SAFETY

- Equipped with an electronic filling pump with overflow protection
- Filling and relighting impossible after operation when the fireplace is hot
- Integrated CO2 sensor (detects the presence of CO2 in the air)
- Product designed for use in the European Union

### HEAT OUTPUT

- Heat output :  
Installation : not connected 7kW  
Installation : connected 9kW

### AUTONOMY

- Remote control on/off (cannot adjust heat output)
- Electronic ignition
- Battery autonomy 9 ignitions / 7 bioethanol refills
- 3 m power cable supplied for recharging the battery
- Autonomy:  
Installation: not connected 8h minimum room volume 125 m<sup>3</sup>  
Installation: connected 7h

### GUARANTEE 2 YEARS

## WHAT'S THE DIFFERENCE BETWEEN THE DOMOFOCUS AND THE GYROFOCUS?

The Domofocus is the culmination of a double design quest: for a generous and welcoming organic shape, yet a more compact volume than its larger forbear, the Gyrofocus with its 1.25-m-diameter hearth.

With a hearth diameter of 1.10 m and an opening that offers a wider smile, the Domofocus was launched in 2015 and became de facto the jolliest model in the Focus range.

## FOCUS, AN INTERNATIONAL DESIGN LEGEND

For over 50 years and across all continents, Focus has been shaking up design codes with its innovations. It was the first to move the fireplace from the wall to the centre of the room, making it the focal point of the interior.

Focus has nearly 150 employees spread over two sites with both feet planted firmly between the Languedoc and Provence in the south of France. Proud of its Made In France moniker, Focus has its head in the stars and its eyes firmly set on the international scene.

With its emblematic fireplace, the Gyrofocus, Focus has definitely entered into international design legend. Focus is more than fireplaces, it creates surprises, emotion, occasion. Focus creates the story.

Focus is readily available throughout the UK, Ireland and around the world.
