Slimfocus Wall - a minimal fireplace with maximum output
Focus launch a new compact wall mounted wood burning fireplace
A refined aesthetic combines with exceptional performance

The original Slimfocus suspended fireplace launched in 2015, has proved to be an overwhelming success for Focus and as a result they have designed this compact wall mounted Slimfocus. It has all the benefits of its predecessor whilst allowing a greater choice of applications (see box opposite). The real allure of this design is its sleek, minimal and cylindrical shape with large glass fronted window that so easily fits into a variety of interiors and can be seen in many significant architectural projects. In addition it has DEFRA*approved status in the UK to add to its potential in urban areas.

The Slimfocus family now consists of a suspended model (wood, fixed or pivoting, single flow or double flow), a floor standing model (wood or gas, fixed, single flow or dual flow) and a wall model (wood, fixed, single flow). These models impress with their elegance and their universal appeal.

The fine-tuned air control system optimises combustion while keeping the generously sized glass clean.

The research and development team at Focus have made many advances in fireplace technology and the new wall Slimfocus is a powerful example of the best in form and function. It is no coincidence that Slimfocus has become Focus' best selling model in a very short time.

PERFORMANCE

| | |
|----------------------|--------------------------------|
| Nominal Heat Output: | 4,5 Kw |
| Efficiency: | 82 % |
| Dust: | 30 Mg/Nm3 |
| Co Output: | 0,10 % |
| Paint finish: | Matte black |
| Dimensions: | Height: 175cm x Diameter: 32.4 |

What makes the difference...

The Slimfocus wall version meets a demand for front connecting ducts. This is particularly useful for homes without ducts (individual houses or apartments).

The Slimfocus model, wood burning stove, has been awarded 7* *Flamme Verte* - France's highest accolade, this equates to the highest energy and environmental performance for wood burning fires.

About Focus

For more than 50 years, Dominique Imbert's creations for Focus have been making design history. It was in 1967 that he designed his first fireplace for his personal use, the model Antéfocus, in the heart of his sculpture studio located at the foothill of the Cevennes. But the creation that really sparked the imagination was the iconic Gyrofocus, created in 1968. Since then, Focus creations are found in both private homes, hotels and some of the most prestigious design museums in the world. Many Focus fireplaces have been awarded international awards for both design and technology.
